New Approach to Employee Engagement

Easy-to-deploy End-to-end Solution.

Engage them to where they Benefit.

Reward Performers and Retain Achievers.

Hire Better.

Why do our Clients build
their own Employee
Benefits Centers?

**Employee Experience
Simply Nurtures
Employee Engagement**

The reality is; investing in employee experience is likely to be one of the most rewarding investments a successful business could make. The impact on both the top and bottom lines are enormous.

Radically increased earnings

According to Gallup research, companies with highly engaged workforces outperform their peers by 147% in earnings per share. That is simply staggering.

Substantial increases in profitability

Towers Perrin found that there is a dramatic gap between the earnings of businesses with highly engaged employees at a 19% increase in earnings per share, and those with the least engaged employees at a 33% decrease in earnings per share.

Greater productivity

Gallup found engaged and motivated employees are 21% more productive than disengaged employees. Further research from McLean & Company found that a disengaged employee can cost a business up to \$3,400 for every \$10,000 in annual salary!

The cost of employee turnover

The costs of recruiting, hiring, training of a new staff member are relatively common knowledge. But the loss in productivity from departing employees (which continues until their replacements are up to speed) is a hidden cost; successful businesses never miss to account for.

The evidence is clear, great employee experiences do not happen by chance - they are deliberately designed and executed, and the ROI is obvious.
